SSW is a Sydney-based consulting company specializing in .NET solutions for progressive businesses since 1990. SSW offers custom software solutions, from IT infrastructure setup and developer utilities to custom-designed software applications, utilizing the latest Microsoft technologies including ASP.NET, VB.NET, C#, SQL Server, XML, Exchange Server and SharePoint Portal Server.

SSW's Chief Architect, Adam Cogan is one of only two Australian Microsoft Regional Directors. His expertise helps SSW deliver cutting edge Microsoft technology solutions.

SSW Application Audit Services are also available to discover where your application can be improved. These services are focused towards companies designing and building applications whether it's a simple developer utilities or a major enterprise systems.

# ExchangeReporter

Get the **information you want** from your company's email system with **SSW Exchange Reporter**

Is Microsoft Exchange Server an integral part of your organization? If so, **SSW Exchange Reporter** provides the tools and reports you need to efficiently analyze your organisation's email usage. Reports range from who is sending the most emails to clients to who has the largest mailbox. The SSW Extraction Windows Service runs on your Exchange Server to seamlessly extract your email messages and mail folder statistics. It is a very lightweight Windows Service and the reports are very fast because it uses the power of SQL Server. The built in reports can be customized and extended because they are built with SQL Server Reporting Services.

*“SSW Exchange Reporter is an essential tool for anyone trying to monitor their organization's email. We use SSW Exchange Reporter because it generates professional user friendly reports.”*

The screenshot shows the 'Extraction Manager - SSW Exchange Reporter' window. It includes a menu bar (File, Tools, Help), a title bar, and a main content area. The 'Extraction Manager' section has a 'Get the information you want from your company's email system. More...' link. Below is the 'Extraction Service Status' section with a 'Choose the extraction method' dropdown set to 'Scheduled - Run as a Service (recommended)'. There are 'Start' and 'Stop' buttons. A 'One Time Process' section has a 'Process...' button. The 'Configuration' section shows 'Configure your extraction service' with three green checkmarks: 'Database is configured', 'Reports are configured', and 'Windows Service is configured'. At the bottom, it says 'Version: 8.31' and 'Check for Update'. A 'Microsoft Exchange Server' logo is visible in the background.

Overlaid on the bottom right is a 'Mail Folder Statistics' report. It shows a table of folder statistics and a bar chart below it.

Owner	Messages	Unread	Important	Size
RupertCookeau	176	3	0	10.8 MB
IanRoberts	132	13	0	10.8 MB
IndraPal	110	2	0	6.5 MB
RubensBolin	101	26	0	4.5 MB
FabioGouvea	50	0	1	10.2 MB
<b>Total</b>	<b>620</b>	<b>754</b>	<b>413</b>	<b>618.9 MB</b>

The bar chart below the table shows the distribution of messages by status: Read (blue), Unread (grey), and Important (red). RupertCookeau has the highest number of messages (176), followed by IanRoberts (132) and IndraPal (110).
